Automatic Tax Calculation

Tax (by rate or table) is computed automatically and added to each sale. Tax status can be shifted as items are entered or at the completion of the sale.

16 Departments

The SAM4s ER-180 features 16 departments and is designed for ease of operation and point of purchase control in gift shops, kiosks, food stands and other small retail applications. Departments may be preset to price and track individual items, or be designated 'Single Item' for fast registration of single item sales.

100 PLUs

Use the ER-180's price look-ups (PLUs) to automatically price for up to 100 fast moving items. PLUs can also accept open price entries.

Six Position Keylock

OFF, REG, X, Z, P, and S modes.

Heavy-Duty Digital Line Printer

The ER-180 two-inch wheel type digital line printer accepts 58mm (2 1/4") paper

and is programmable to select receipt or journal printing. Use the included paper take-up spool for journal printing.

Percent (%) Keys

Percent discount operation can apply to a single item or an entire sale. You can program a set rate or allow variable rates to be entered if no rate is programmed.

Financial and Cash-in-Drawer Reports

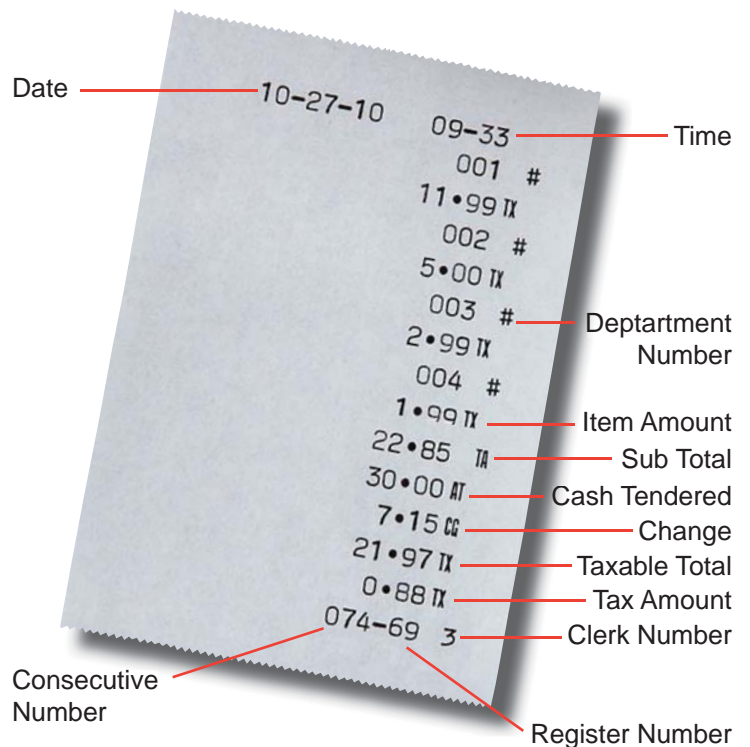

The SAM4s ER-180 gives you a thorough review of your business with a complete analysis of your department sales, function totals and actual drawer totals to help you protect your profits.
